| 29 - What is the greatest strength of this class? | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Return Rate | 6/22 (27.27%) |
| <ul style="list-style-type: none"> • Learned some html coding and how to use dreamweaver • The course offered a great introduction to web design. The assignments were cohesive and aided in understanding the concepts. I appreciated the time spent on SEO and Google's indexing methodology. • The amount of information learned. • It is a great beginner-type class and the content is very interesting. • Showing how a website for a business can be made without delving too much into intricacies. • I really learned a lot from this class and would like to continue classes like this. A lot of learning happened out of the book but it was a step by step process with examples that couldn't be done as easily presenting to full class. Teacher posted all necessary info on blackboard making this class very easy with all the information I could need at my fingertips! | |

| 30 - What improvements can be made in this class? | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Return Rate | 6/22 (27.27%) |
| <ul style="list-style-type: none"> • The professor made the class take exams that were two part on the computer which involved interaction and creating web designs under a time constraint. For me this was difficult because i feel that the material is not something that can be judged by time. TO properly design or work on a website it should take time and be perfected. The exams were highly inaccurate of learning ability and using the material correctly. I am disappointed in the professor when this is a BEGINNING LEVEL COURSE FOR WEB DESIGN! • There was a disconnect between the book projects and the final project. The book projects had the structures pre-made in the html & css files, and the final project didn't. I would suggest assigning the project one week earlier. • Figure out a way that this course will take up less time. I spent over 12 hours a week on this material at times and that is too much for a 200 level course. • Assignments should be graded sooner as I wasn't able to adjust future assignments based on comments. • Use more CS/SE concepts. • Because a lot of learning happened out of the book in-class time seemed somewhat lengthier than it needed to be to discuss the material. | |

| <ul style="list-style-type: none"> • I would never recommend this class for the amount of out of class work. • It was a pleasure taking this class, and I appreciate the timeline and structure of the lectures. • I learned a lot. Dan Rush was a very open, flexible and professional teacher. • It was my favorite class of the semester. I thoroughly enjoyed it. | |
