Q: What barriers to learning, if any, did you experience in this course?

- 1 The amount of work that was being given each week for the team became difficult to manage when there were aspects that required the team to meet.
- 2 Since we worked in teams, we didn't always get hand on exposure to all of the homework exercises.
- 3 It was really hard to figure out the sprint framework at first. I was unsure of the scope of the tasks we were supposed to complete.
- 4 The real life project took almost too much class time away, forcing me to teach myself at home.

- 5 na
- 6 none
- 7 n/a
- 8 Not many.
- 9 Not really a barrier but there is just a ton of information to go over.
- 10 N/A
- 11 There was not enough time each class period to really focus on the topics. The course was way too much over a summary/overview to be valuable in the real world. This in part was what made this course easy, there was no real depth.

Q: Which aspects of this course were most valuable to your overall learning experience?

- 1 The group work was interesting and a great learning experience for actual team contribution.
- 2 Learning the various types of project management styles, formats, techniques and methods. All of which add to my project management tool set and will be used in the future
- 3 I really enjoyed working in teams and actually applying the different knowledge areas and process groups to our projects.
- 4 the project
- 5 project phases and what to do in those
- 6 We got to choose our own teams and homework. My group in this class was by far the best group I've had all of college and truly made tis class enjoyable. Dan's involvement with the groups (speaking to our group in specific) was super meaningful to me and drove my success within my group and this class. Dan is one of those professors that you remember after college. He has a genuine passion for his career and expresses interest in his students' successes inside and outside of the classroom.
- 7 The sprints and actually having to do the deliverables.
- 8 Learning project management while working with teams. Learning that there was so many tools to help in many things along the way.
- 9 Project Management
- 10 Lectures
- 11 The real life project taught me a lot about dealing with adversity in PM
- 12 The professor was engaging. It was the only class this semester that I was excited to go to. It made me not want to miss any classes.
- 13 If ease counts as value in regards to my overall learning experience then I'm going with ease. This course was easy and allowed me to focus on more difficult courses.
