4. Do you have any other comments for the TA?

Text Response	
It's great to have a TA in this class, he helps us in technical and material stuffs a lot	
Would have been nice to have multiple people available to assist with the lab. Dan did a great job; however, there was only one of him!	
Great job Dan! I appreciated your help as a teacher and helping when I struggled with the hows by coaching through the thought process and not the exact step.	
Set office hours at the beginning of term. Consideration should be given for possible conflicts due to other classes.	
Dan was great. Super helpful and accessible	
Best TA ever, will make an amazing professor	
Dan did a great job - I think the class needs 2 TAs though to sufficiently help all groups. Also, would appreciate more practice problems and answers before quizzes!
